PROFESSIONAL EXPERIENCE

REA Group (realestate.com.au)
Software Developer

Richmond, Victoria, Australia
March 2024 - Present

- Worked in Customer 360, Customer Marketplace, Customer Product & Experience; managed and operated the software platform and data that power the customer experiences for real estate agencies and businesses.
- Contributed to developments of Customer Marketing Journey; built interfaces to populate marketable audiences and publish data to the marketing platform, enabling omni-channel marketing notifications.
- Led the development of Customer Marketing Email Archiver; built a service in Lambda to process and archive email copies, facilitating access to the marketing communication history.

Amazon Web Services
Software Development Engineer

Sydney, New South Wales, Australia
October 2021 - March 2024

- Worked in Modelled Change Management, Builder Tools; managed and operated the software tool that is used to define, review, schedule and execute changes to production systems.
- Contributed to developments of Website Modernisation; built a new React website to replace the legacy Ruby on Rails site, modernising user interfaces and enhancing user experiences.
- Contributed to developments of Change Automation; built services to automate changes on integrated systems, increasing change velocity, reducing errors, and minimising user toil.
- Led the development of Executor for Change Automation; engineered the system architecture; implemented State Machine Activity workers in Step Functions to enable the execution of automated changes.
- Revised the search strategy to optimise performance by remodelling document structures and index mapping, resulting a 30% increase in search speed on Elasticsearch.
- Revised the data persistence strategy to optimise performance by utilising single-table design on non-relational database, resulting a 20% increase in read/write speeds on DynamoDB.

Deloitte
Consultant

Melbourne, Victoria, Australia
March 2020 - October 2021

- Worked in Cloud & Engineering, Core Business Operations, Consulting; provided technical consulting services to external organisations and clients; devised cloud-based solutions and software systems.
- Built an application on Microsoft Azure to transform customer invoices and ingest data into Dynamics 365.
- Built micro-services on OpenShift to transfer high volume real-time weather data; developed testing solutions in Cucumber.
